

SCME & MNTeSIG

The Support Center for Microsystems Education (SCME) provides Micro Nano Tech (MNT) educational materials, and professional development opportunities. Recently, we have been awarded an Undergraduate Research Experience supplemental grant to provide technician students the opportunity to learn about micro fabrication, design and characterization at the University of New Mexico's Manufacturing

Training and Technology Center Cleanroom. We encourage you to participate in our community (MNT^eSIG), take the online short courses, and consider coming out to Albuquerque with your technician students next summer! Feel free to contact me, Matthias Pleil, to learn more!

Key Website Links

SCME-Support.org – Support Center for Microsystems Education Website. This site gives you access to all of the SCME educational materials, asynchronous online short courses and industry maps!

SCME.online – Direct link to the SCME online short courses which can also be found through the SCME-Support.org website.

[MNT^eSIG.net](http://MNTeSIG.net) – Micro Nano Technology Education Special Interest Group, make sure you sign up to receive invitations to meetings, and conferences.
