Award Abstract #1700152

1

**Project**

- The biotechnology stackable certificate and associate degree programs provides the students the technical and academic skills. The project offers students support through counseling, tutoring, industry field trips, external speakers, and internship opportunities. Combined with excellent instruction in the classroom, these activities prepare students for entry-level, middle-skill technician positions. LAMC serves a large underrepresented student body and provides students with employment opportunities in a high growth sector that needs a skilled workforce.

2

**Recruitment**

Virtual Information sessions

- High Schools teachers
- High School Students
- Current College Students
- Prospective Students

3

Biotechnology Course offerings:

Spring 2020 & Fall 2020:

- Lectures - synchronously on Zoom
- Labs - half on zoom (using Labster) & half on campus
- Spring 2020: Virtual Poster exhibition

Remote & On Campus

4

**Internships**

- Summer 2020 Internships
  - Employment
  - Limited internship sites
