Experience STEAM Partners –

Thank you so much for making Experience STEAM a remarkable success! The individual contributions of 44 organizations in the STEAM Carnival provided broad public engagement in addition to the 18 educator workshops, 14 STEAM camps and it fostered enormous potential for future collaborations.

It was a delight and privilege to work with each and every one of you and your organizations! Please pass our (NCAT Team) sincere appreciation and thanks to everyone on your team who made Experience STEAM possible.

We are working on a comprehensive report to capture the impacts and lessons learned from this ambitious pilot project. We will share this information with your teams, so you can utilize the data to support meeting your organizational goals and missions from this event and future developments.

We look forward to following up with each organization to explore your experience and recommendations for future opportunities. Experience STEAM would not have been possible without the knowledge, passion and commitment that each of the partners brought to the event.

With sincere gratitude for your support,

- NCAT Team

Tremendous thank you to NCAT staff who made Experience STEAM a reality.

Aaron Sykes, NCAT STEAM Outreach Coordinator & Experience STEAM Director

Chelsea Bladow, NCAT Equity & Inclusion Comm Director

Megan Hall, NCAT Office & Administrative Specialist

- Jill Renslow, MOA Senior Vice President

“

Experience STEAM is a revolutionary approach to educational outreach. NCAT believes experiential learning provided by two-year technician education is a driving force in advancing social and economic mobility. Our team is focused on creating accessible pathways to technician education to anyone who wants it. Our dream is that Experience STEAM will offer life changing opportunities to connect people to education using hands-on learning. With thoughtful collaboration, we can spark the imaginations of our nation's future skilled technical workforce.

Jon Beck, NCAT Executive Director & PI
